PROFESSIONAL SUMMARY

Resourceful Computer Science graduate currently completing national service, actively building real-world applications and collaborating on innovative tech solutions. Experienced in developing practical products such as inventory systems, dashboards, and web platforms using React and modern frontend tools.

Passionate about turning ideas into functional solutions, with hands-on exposure to blockchain technologies, decentralized systems, and financial markets, including active experience in trading and strategy development. Has participated in hackathons and thrives in fast-paced, team-oriented environments. Brings a strong builder mindset, adaptability, and a drive to create impactful technology that solves real-world problems.

EDUCATION

University of Ghana, Legon – Accra, Ghana

Jan 2022 - Feb 2026

Major: BSc Computer Science

Relevant Coursework: Object-Oriented Programming and Data Structures (Java & Python), Intro to Design and Programming for Web (HTML & CSS), UNIX Tools and Scripting, Introduction to Database Systems, Network Servers & Infrastructure, Introduction to Artificial Intelligence.

WORK EXPERIENCE

Intern

GlobalCode Python and git codecamp

- Acquired foundational and intermediate skills in Python programming.
- Explored web development with Python Flask and utilized Python for Raspberry Pi programming.
- Received instruction from software engineers and professionals on collaborative project development using Git.
- Collaborated with peers on a project to create an event management system website using Flask, HTML, and CSS.

Software Engineering

University of Ghana

- Completed a software engineering course during my second year.
- Collaborated with team members on a project for Dimple Innovation

International, developing an interactive website.

- Gained exposure to the software development life cycle.

Network and IT Product Engineer

Huawei Technologies, Accra- Ghana Enterprise Sales Department

- Support sales team as a Presales engineer with network and IT products insights, proposals and POCs.
- Collaborate with team on various Enterprise projects and deployment of network and IT solutions and products to improve team work capabilities.
- Successfully configured and installed Huawei Access points and switches for massive indoor Wi-Fi projects.
- Completed POC installations for various verticals on smart screens, Access points, switches, storage servers and CCTV's.
- Organized and led workshops and technical salon for various verticals including the Education, Health, ISP and Finance Industry to enable partners and customers.

PROJECTS

Movie app

<https://react-movie-app-self-sigma.vercel.app/>

- Developed a **movie browsing application** using **React.js** and **Tailwind CSS**.
- Leveraged **React's component-based architecture** to create a **dynamic and responsive** user interface for seamless movie exploration.
- Integrated a **third-party movie API** to fetch and display real-time movie data, enabling users to search and view detailed movie information.

Prom Autos website

<prom-autos-m17fa5t52-ransford-ots-projects.vercel.app>

- Designed a dynamic and interactive user interfaces for a car sales company using Figma as a project for my Human, Computer Interaction course.
- Leveraged the power of REACT JS with TAILWINDCSS to build the interface.
- Implemented search functionality, smooth section scrolling, and interactive 'Read More' and 'View More' buttons for seamless user experience, frontend only.

VentraPOS

<https://ventrapos.vercel.app>

- Collaborated with team members on a final year project to build a system to give small businesses a complete system to manage operations, from staff and finances to inventory, plus a fast, modern POS, all for GHS 149.
- Used React.js with tailwind CSS and daisyUI to develop an interactive and comprehensive frontend.
- Used RESTful API endpoints to connect the React.js frontend with the Django backend.

SKILLS

Programming Languages:

Python • JavaScript

Web & Software Development:

React JS • Flask • REST APIs • MySQL • WordPress

Tools & Platforms:

Git • Figma • Canva

IT Infrastructure & Networking:

Data Center Infrastructure (Compute, Storage, Networking) • Networking Fundamentals (TCP/IP, VLANs, Switching, Routing)

Surveillance & Security Systems:

CCTV & Surveillance Systems (IP Cameras, NVR/DVR, VMS)

CERTIFICATIONS

-

Introduction to DevOps – IBM

Issued: 4 August 2023

[View Certificate] <https://www.coursera.org/account/accomplishments/verify/LD2YNT8ES2XW>

-

Introduction to Databases – Meta

Issued: 14 January 2024

[View Certificate] <https://www.coursera.org/account/accomplishments/verify/Y73JSHJN5FXS>
